

# Card Controls

Online and mobile account access is more than just an overview of your accounts. Customers can have the ability to take their account security into their own hands. Featuring five different types of notifications for a safer banking experience.

Manage alerts in online and mobile banking.

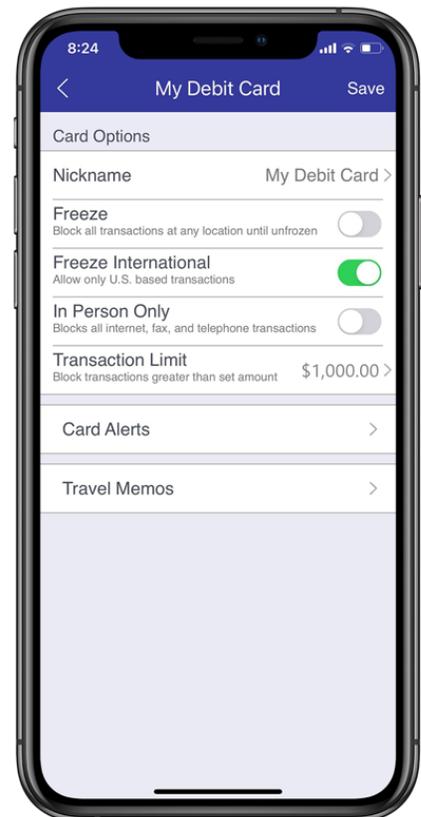

Set up notifications for high dollar threshold, purchase types, and fraud alerts.

Notifications can be received by email and SMS.

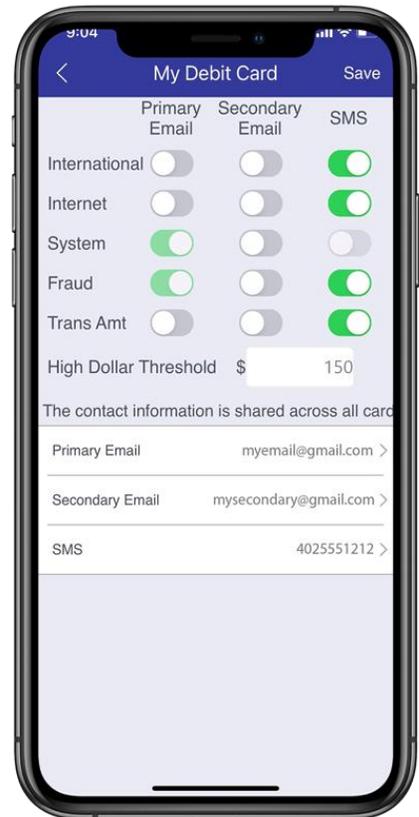

## Card Options

- Custom name for each debit card
- Option to freeze each card to block all transactions
- Option to block international transactions
- Option to block all transaction via internet, fax and telephone and only allow in person transactions
- Set transaction limit. Only transactions below this threshold will be allowed to process.

## Card Alerts

- Setup alerts to be sent by email and/or SMS for each of the following alert types:
  - International
  - Internet
  - System
  - Fraud
  - Transaction Amounts above the high dollar threshold value
- Setup your primary and optional secondary email address
- Setup your SMS mobile phone number

# Travel Memos

Travel memos are designed to monitor usage patterns for a particular card based upon a date range. Once approved they allow SHAZAM's fraud detection system to adapt to the cardholder's travel. Give your customers the flexibility to use their card anywhere in the world.

Access memos in online and mobile banking.

Create memos to monitor travel in the United States or out of the country.

Pre-approve memos to start monitoring travel right away.

## Adding a Travel Memo

Add the following information:

- Email address
- Phone number
- Custom trip name
- Memo text
- Start and end dates
- Select locations of travel
